Asha Raman

Product Analyst

asha.raman@example.com | Bengaluru, India | https://example.com

SUMMARY

Product analyst with four years of experience translating customer and operational data into product decisions for mobility and learning platforms.

SKILLS

Analysis: SQL, Python, Experiment design, Dashboarding

Product: Funnel analysis, Customer research, Requirements discovery

EXPERIENCE

Product Analyst | Meridian Mobility

Bengaluru, India | Jul 2023 - Present

- Built a weekly activation funnel in SQL and Python that helped the product team identify two onboarding drop-off points.
- Designed an experiment for a revised driver checklist; the confirmed release increased first-week completion from 62% to 71%.
- Combined support themes with usage data to prioritize three reliability fixes for the quarterly roadmap.

Data Analyst | Northstar Learning

Remote | Jun 2021 - Jun 2023

- Automated the monthly learner-retention report, reducing preparation time from two days to three hours.
- Partnered with product and curriculum teams to define adoption metrics for four new course features.

PROJECTS

Public Transit Reliability Explorer | https://example.com

Feb 2024 - May 2024

Personal data-visualization project using an openly licensed transit feed.

- Created a reproducible Python pipeline and dashboard for comparing route reliability across time periods.

EDUCATION

Bachelor of Engineering, Information Science | Example Institute of Technology

Mysuru, India | 2021

CERTIFICATIONS

Product Analytics Foundations | Example Learning Lab
